

## AMBO Pipeline Authentication Statement

Date: 07-10-2023

To Whom It May Concern,

We, ObsidianFi, are writing to provide an official authentication statement regarding the legitimacy of AMBO Pipeline and the accuracy of their public claims. We have undertaken a rigorous authentication process to validate the information presented by AMBO Pipeline. We hereby authenticate the following points based on our thorough verifications and validations conducted by our team members:

### **Financing:**

ObsidianFi has diligently verified that AMBO-Pipeline LTD has successfully secured \$500,000,000 in financing. Our team has meticulously examined the relevant documentation and financial records, including a meeting with the financing group on March 24th 2023, confirming the accuracy and legitimacy of this statement.

### **Right of Way (ROW):**

We have extensively validated that the proposed project's 'Right of Way' (ROW) has been established with the host countries along the route. The ROW primarily aligns with the EU's Corridor VIII Transportation Link, encompassing crucial infrastructure such as rail, highway, telecommunications, gas, and energy networks. Furthermore, ObsidianFi can confirm that the necessary border crossing points have been agreed upon and passed through the respective Parliaments. Our examination of legal and governmental agreements firmly supports the authenticity of this information.

### **Verification of AMBO-Pipeline LTD Team:**

ObsidianFi has diligently conducted meetings with the AMBO-Pipeline LTD team to verify their roles and positions within the company. Through direct interactions and a comprehensive assessment of their professional backgrounds, we can confidently authenticate the involvement and responsibilities of the team members in relation to the project. Specifically, we have personally met with Ted (on March 5th 2023), who is identified as the lead of the Alaskan pipeline project and AMBO LLC. Through in-depth discussions and a thorough review of Ted's credentials, ObsidianFi can verify his role and affirm that he will actively contribute to the project's successful realization.

Please note that this authentication statement is based on the information and evidence available to ObsidianFi up until July 6th, 2023. Acknowledging that any future developments or changes may necessitate an updated verification process is crucial.

Please do not hesitate to contact us if you require further clarification or additional information. We remain at your disposal to provide any guidance or assistance you may require.

Sincerely,

ObsidianFi (info@obsidianfi.com)
